Experience

SAG, DRDO

Summer Trainee

New Delhi, India

Jun 2025 – Jul 2025

- Designed and deployed a cloud-based IoT solution using **MQTT** protocol for reliable, low-latency device communication.
- Developed a serverless AWS backend (**IoT Core, Lambda, DynamoDB, API Gateway**), enabling bidirectional data pipelines with latencies under 10ms.
- Migrated hardware proof-of-concept from Arduino MEGA to **ESP32**, reducing unit cost by **50–60%** while integrating built-in Wi-Fi/Bluetooth, and developed a real-time web control dashboard.

Adxania Cybersolutions Pvt. Ltd.

Remote

Web Development Intern

Dec 2024 – May 2025

- Engineered modular architecture for a digital marketing SaaS platform handling automated email, SMS, and WhatsApp campaigns.
- Architected and indexed centralized data access layers to optimize marketing workflow query throughput.
- Produced wireframes and UI components following UX design standards to accelerate frontend feature delivery.

Projects

ResumeAI – Custom Resume Generator

[GitHub](#) | [Live](#)

React, TypeScript, Node.js, Express, MongoDB, ShadCN, Mistral AI API, GitHub Actions

- Built the frontend in React with TypeScript, ensuring type-safe component architecture and reducing runtime errors.
- Designed MongoDB schemas to persist resume data — user profiles, sections, and version history.
- Integrated Mistral AI API to generate targeted resume content with structured JSON schema outputs for parsing consistency.
- Implemented unit tests via GitHub Actions CI pipeline, gating merges on automated test passes before deployment.
- Developed an automated Job Description parser to identify missing target keywords and increase ATS relevance scores.

AI Crop Disease Detection System

[GitHub](#)

React.js, Node.js, Express.js, MongoDB, Tailwind CSS, Cloudinary

- Designed full-stack platform architecture bridging web upload endpoints with machine-learning inference services.
- Implemented REST endpoints handling concurrent image uploads, preprocessing, and model prediction delivery.
- Configured MongoDB schemas to store diagnosis logs, image metadata, and targeted treatment guides.

Technical Skills

Languages & Frameworks: TypeScript, Java, Python, JavaScript, C++, HTML/CSS, React.js, Node.js, Express.js

Backend & Cloud: AWS (Lambda, IoT Core, DynamoDB, API Gateway), RESTful APIs, MongoDB, PostgreSQL, MySQL

Tools & Practices: Git, GitHub, Docker, Postman, Agile/Scrum

Education

Maharaja Agrasen Institute of Technology

New Delhi, India

Bachelor of Technology in Computer Science and Engineering (CGPA: 8.5)

2023 – 2027

- Relevant Coursework:** Data Structures & Algorithms, Operating Systems, DBMS, Distributed Systems (NPTEL), Artificial Intelligence.

Achievements

- Competitive Programming:** Solved **600+** problems on LeetCode; achieved a **1600+** contest rating.
